# Build your own 'Ron's Gone Wrong'-inspired B*Bot

Celebrate the release of 20th Century Studios and Locksmith Animation's 'Ron's Gone Wrong' by designing and making your very own papercraft B*Bot!

## INSTRUCTIONS

**Tip!**
Cut
- - - - - -
Fold

**You'll need:**

> Scissors

> Adhesive (Glue Stick or Double-Sided Tape)

> Colouring Pencils/Pens to add a design to your Bbota

**1** Colour and create a design for your B*Bot (or keep it plain if you want to).

**2** Cut out your B*Bot using a pair of scissors along all of the solid black lines (ask an adult if you need help with this).

**3** Fold along all of the dotted lines (this is called 'scoring').

**4** Starting with the tabs labelled 'A' apply a small amount of adhesive (e.g. using a glue stick or double-sided tape).

**5** The piece should fold and slot nicely underneath the next section, press firmly to allow the adhesive to stick.

**6** Repeat this process with tabs B, C, D, E and F.

**7** Now join the two sides together by sticking tab G to other side of the body.

**8** Repeat the same actions that you used on the top half now on the bottom half with tabs H, I, J, K, L and M.

**9** Now it's time to add your arms and wheels, apply a small amount of adhesive to the back of the wheels and stick them to the bottom sides of your B*Bot.

**10** To install the arms, fold along the dotted lines and apply a small amount of adhesive to the small tabs and attach these to the side of your B*Bot (try to line the top of them up with the eyes and mouth).

# RON'S GONE WRONG

## ONLY IN CINEMAS

'Ron's Gone Wrong' is only in cinemas from Oct 15.
